

# How to Post Charts from The Thing to Your Facebook Business/Fan Page

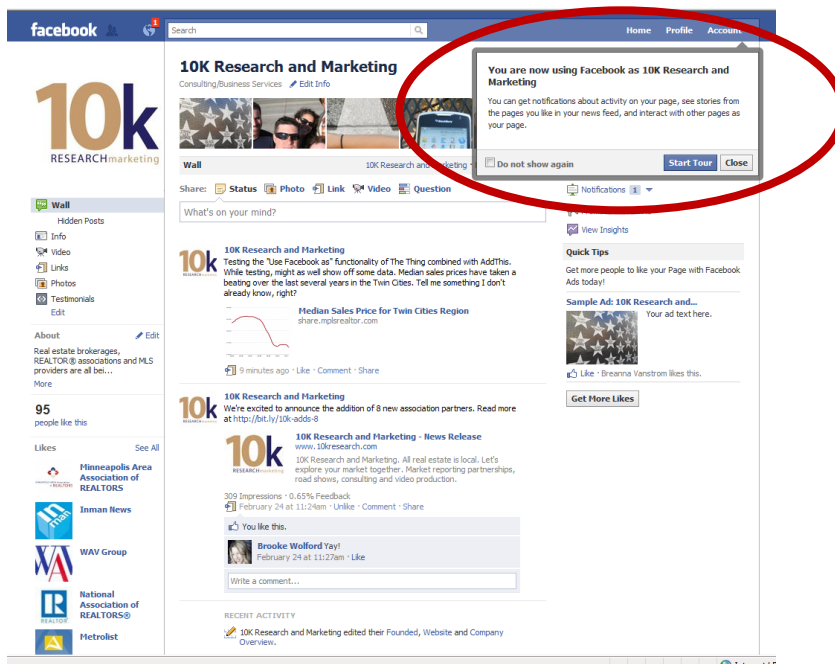

1. From your personal Facebook page, search for or go to your business/fan page.

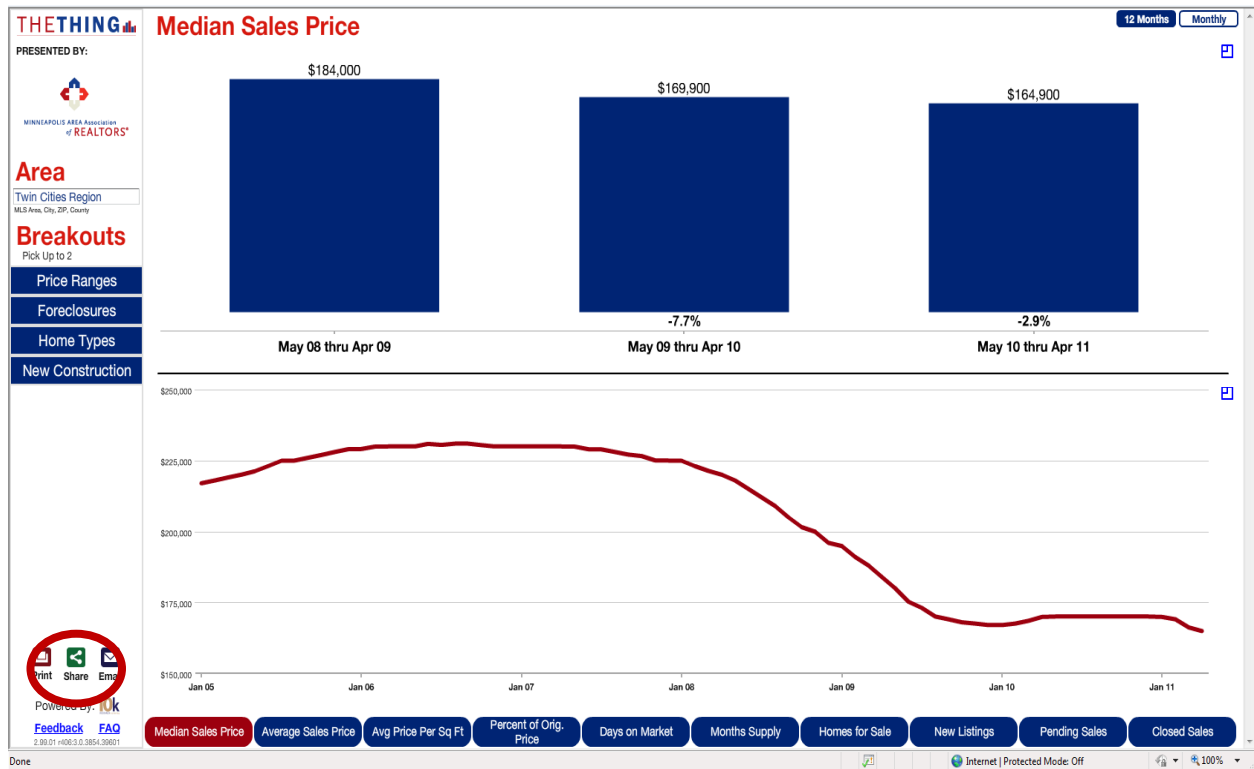

2. On your business/fan page, select the "Use Facebook as Your Business/Fan Page" link.

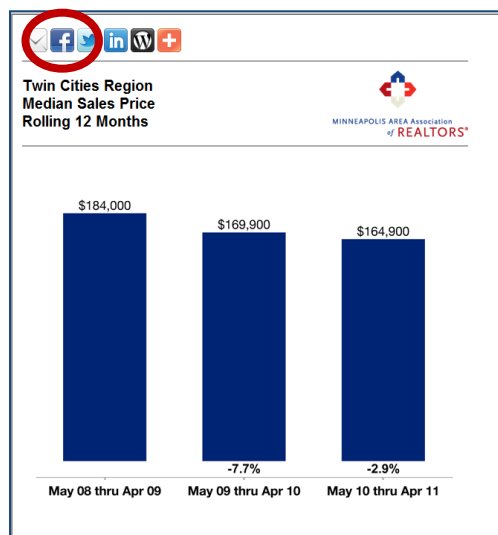

3. A notification box will appear to indicate that your business/fan page is now your primary profile.

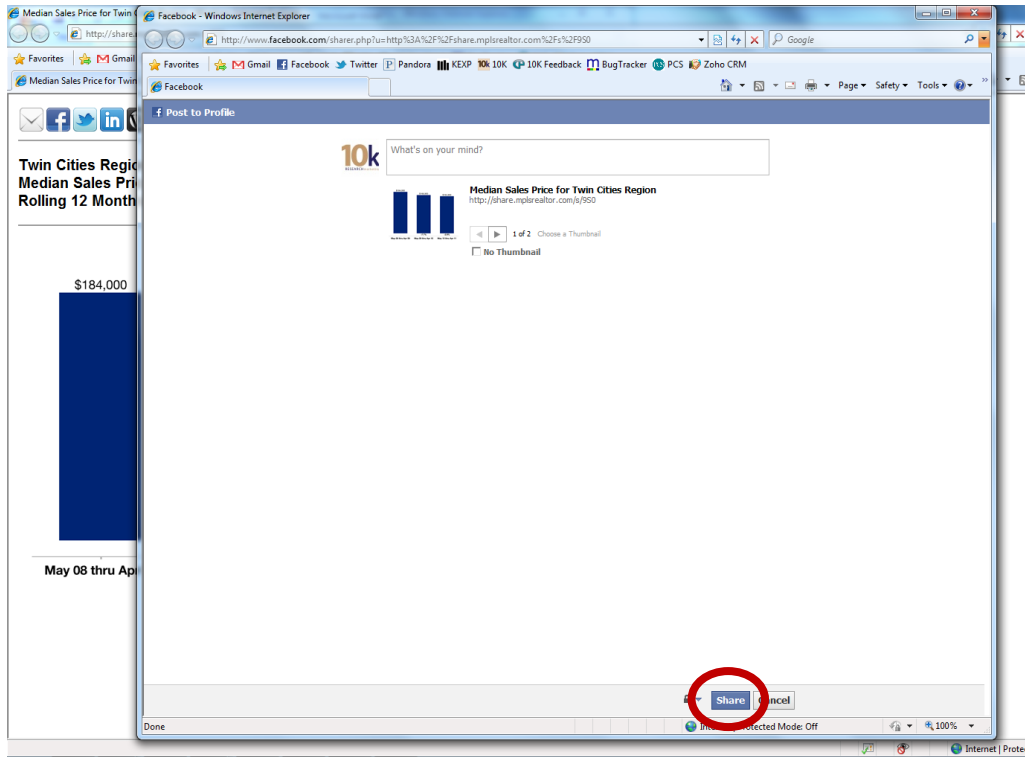

4. Now go to The Thing (<http://thething.mplsrealtor.com>), select the charts you want and then click “Share” (lower left).

5. After following the prompts to share the charts you’ve built, a landing page will open up. Select the Facebook icon.

6. After selecting the Facebook icon, the post to profile box that opens up will be pointed to your business/fan page. Just type in any message you'd like to add and click "Share."

7. To go back to your personal page, go to Facebook and click the "Use Facebook as Your Name" at the top right.
